COMPLIANT

Audit Score:

Websites with a score lower than 95 are at risk of accessibility lawsuits

WCAG 2.2 Criteria:

What is the WCAG?

Critical Issues	0
Passed Audits	38
Required Manual Audits	3
Not Applicable	30

Critical Issues (0)

Passed Audits (38)

Required Manual Audits (3)

Not Applicable (30)

Interaction and Navigation Tests

#	Issue	Status
1	Skip links are focusable.	Passed Audit
2	<code>`[aria-hidden="true"]`</code> elements do not contain focusable descendents	Passed Audit

Screen Reader and Assistive Technology Tests

#	Issue	Status
1	Image elements do not have <code>`[alt]`</code> attributes that are redundant text.	Passed Audit
2	List items (<code>``</code>) are contained within <code>``</code> , <code>``</code> or <code>`<menu>`</code> parent elements	Passed Audit
3	Lists contain only <code>``</code> elements and script supporting elements (<code>`<script>`</code> and <code>`<template>`</code>).	Passed Audit
4	Links have a discernible name	Passed Audit
5	Image elements have <code>`[alt]`</code> attributes	Passed Audit
6	<code>`<html>`</code> element has a valid value for its <code>`[lang]`</code> attribute	Passed Audit
7	<code>`<html>`</code> element has a <code>`[lang]`</code> attribute	Passed Audit
8	Document has a <code>`<title>`</code> element	Passed Audit
9	Buttons have an accessible name	Passed Audit
10	<code>`[aria-*]`</code> attributes match their roles	Passed Audit
11	ARIA attributes are used as specified for the element's role	Passed Audit
12	Deprecated ARIA roles were not used	Passed Audit
13	<code>`[aria-hidden="true"]`</code> is not present on the document <code>`<body>`</code>	Passed Audit
14	Elements use only permitted ARIA attributes	Passed Audit
15	<code>`[role]`</code> s have all required <code>`[aria-*]`</code> attributes	Passed Audit
16	Elements with an ARIA <code>`[role]`</code> that require children to contain a specific <code>`[role]`</code> have all required children.	Passed Audit
17	<code>`[role]`</code> s are contained by their required parent element	Passed Audit
18	<code>`[role]`</code> values are valid	Passed Audit
19	<code>`[aria-*]`</code> attributes have valid values	Passed Audit
20	<code>`[aria-*]`</code> attributes are valid and not misspelled	Passed Audit
21	Values assigned to <code>`role=""`</code> are valid ARIA roles.	Passed Audit
22	Identical links have the same purpose.	Passed Audit

Visual and Structural Accessibility Tests

#	Issue	Status
1	Touch targets have sufficient size and spacing.	Passed Audit
